WELCOME TO THE WONDERFUL WORLD OF SA SKIRTING

Your Premier Manufacturer & Supplier of Skirting, Mouldings, Architraves & other wooden products

WHAT IS A SKIRTING?

A skirting board – sometimes known as a baseboard (US) or incorrectly called a cornice – is a decorative and protective element installed at the base of your walls. It serves both form and function by:

- Providing a clean, finished look where the wall meets the floor.
- Helping to conceal uneven flooring edges or minor wall imperfections.
- Offering a subtle design element that enhances the proportions and style of a room.

Skirting can be crafted from a variety of materials, each offering different aesthetics and performance. **The most common skirting materials we offer in South Africa are:**

Different finishes available: *PRIMER, PAINT & VARNISH*

SA SKIRTING
SKIRTING • MOULDINGS • ARCHITRAVES

AVAILABLE MATERIALS:
Meranti, Saligna, Pine, MDF & White Oak

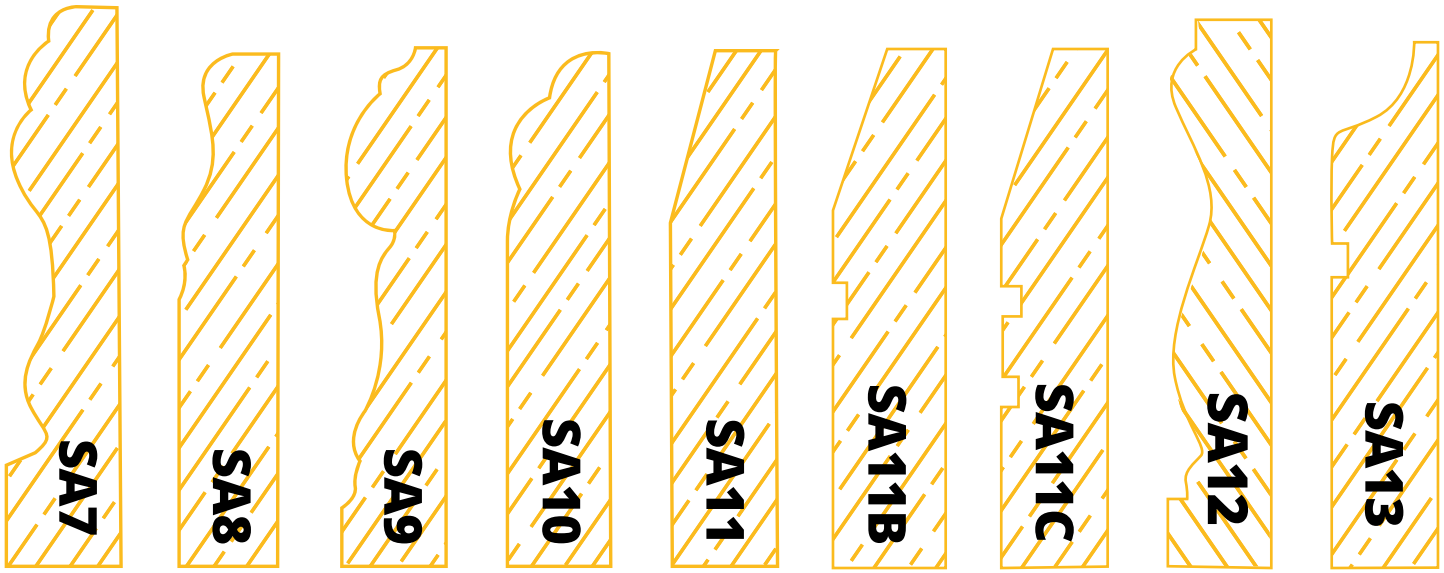

Custom sizes and other species of wood available on special request and pricing

Flooring profiles:

T-PROFILE

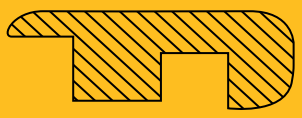

A T-Profile is a sleek flooring trim that bridges gaps between same-level floors, offering a seamless and durable transition.

BULLNOSE

A Bullnose Profile is a rounded edge trim that provides a smooth, elegant finish to steps, ledges, and flooring edges.
Also Available as Square Nosing

XL T-PROFILE

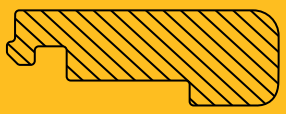

An XL T-Profile is a wider transition trim designed to bridge larger gaps between same-height floors, offering extra coverage with a seamless, durable finish.

FLUSH BULLNOSE

A Flush Bullnose is a smooth, rounded edge trim that sits level with flooring or surfaces, creating a clean, modern finish for stairs, steps, or edges.
Also Available as Tongue & Groove

END PROFILE

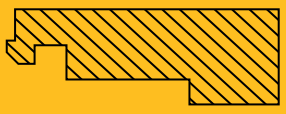

An End Profile is a finishing trim used to neatly close off flooring edges against walls, sliding doors, or thresholds, providing a clean and professional look.

FLUSH NOSING

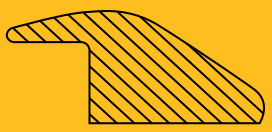

Flush Nosing is a trim that creates a smooth, level edge where flooring meets stair treads, offering a sleek, safe, and modern stair finish.
Also Available as Tongue & Groove

SLANTED REDUCER

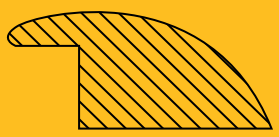

A Slated Reducer is a transition trim designed to bridge flooring of different heights, providing a gradual, stylish slope for a smooth and safe step-down.

ROUND REDUCER

A Round Reducer is a curved-edge trim that smoothly transitions between floors of varying heights, offering a soft, clean finish and safe step-down.

AVAILABLE MATERIALS:
Meranti, Saligna, Pine, MDF & White Oak

Custom sizes and other species of wood available on special request and pricing

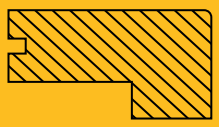

Flooring profiles:

SQUARE NOSING

Square Nosing is a sharp-edged trim that provides a clean, modern finish to stair treads and flooring edges, enhancing both safety and style.

FLUSH NOSING GROOVED

Flushed Nosing Grooved is a level stair edge trim featuring grooves for added slip resistance and a sleek, secure finish.

FLUSH NOSING TONGUED

Flush Nosing Tongued is a stair edge trim with a tongue design for secure fitting, providing a smooth, level, and durable finish.

MULTI-COVER

The multi cover strip is a versatile floor trim that bridges gaps between different floor types or between flooring and skirting, ensuring a clean, protected finish.

EXPANSION COVER

The expansion cover strip is a flexible floor trim designed to cover expansion gaps between flooring and skirting, allowing movement while maintaining a neat, finished look.

UNEQUAL ANGLE

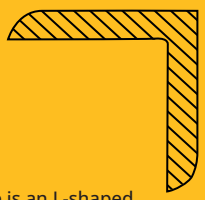

An unequal angle is a wooden profile with two legs of different lengths. This can be used as a nosing or corner protector.

EQUAL ANGLE

An equal angle is an L-shaped steel section with equal sides, used for structural support and reinforcement.

BEVELED EDGE

A beveled edge is a slanted or angled edge cut into a material for smoother finishes, improved aesthetics, or easier fitting.

MATERIAL COMPARISON GUIDE

Meranti – Our Most Popular Choice

- **Appearance:** A versatile, fine-grained hardwood with a beautiful pinkish tone and excellent strength.
- **Finish:** Best suited to staining for a uniform finish. Clear varnish is possible, but variations may not appeal to all.
- **Durability:** High density hardwood. Very resistant to denting, warping, and bowing.
- **Ideal For:** Clients who want a durable, elegant wood with rich character and don't mind or even love natural variation.

Saligna – A Beautiful, Cost-Effective Alternative

- **Appearance:** More uniform grain and colour, usually a soft pink.
- **Finish:** Takes well to both clear varnish and stains, providing a consistent finish.
- **Durability:** Slightly less dense than Meranti but still classified as a hardwood. We produce Saligna skirtings slightly thicker to enhance stability.
- **Ideal For:** Those seeking a cleaner look at a more affordable price point, without sacrificing hardwood quality.

Pine – Budget-Friendly and Versatile

- **Appearance:** Light colour with minimal knots (we only use Clear Pine – no large knots or joins).
- **Finish:** Can be varnished for a rustic timber look or stained, though it absorbs stain less evenly than Meranti or Saligna.
- **Durability:**: As a softwood, Pine is more prone to denting and warping. Best stored in a cool, dry place before installation.
- **Ideal For:** Budget-conscious clients who still want the beauty of timber. Pine is our most affordable option.

Supawood (MDF) – Sleek & Paint-Ready

- **Appearance:** Uniform, flat surface with no grain or knots.
- **Finish:** Ideal for painting – offers a sleek, modern look.
- **Durability:** Not as strong as hardwood and not moisture-resistant, best for dry interior use only.
- **Ideal For:** Clients wanting a clean, painted finish in contemporary spaces.

White Oak – Premium and Timeless

- **Appearance:** Light to medium brown tones with a subtle, straight grain and clean, knot-free finish for a refined look.
- **Finish:** Takes stains and sealers exceptionally well, allowing for a range of finishes from natural matte to rich, darker tones.
- **Durability:** A hardwood known for its strength and stability, highly resistant to wear, making it ideal for long-term use.
- **Ideal For:** Clients looking for a high-end, elegant finish with excellent durability and a modern, natural aesthetic.

Water-Resistant HDF – Durable and Practical

- **Appearance:** Smooth, uniform surface with a clean, modern look - ideal for painted or pre-finished profiles.
- **Finish:** Excellent for paint finishes, providing a consistent, flawless result with strong adhesion.
- **Durability:** High-density and moisture-resistant, making it less prone to swelling or warping in humid areas compared to standard MDF.
- **Ideal For:** Bathrooms, kitchens, and high-moisture environments where durability and a neat painted finish are essential.
